CURRENT POSITION

CONSULTANT ORTHOPAEDIC FOOT AND ANKLE SURGEON THE LONDON ORTHOPAEDIC CLINIC, 79 WIMPOLE STREET, LONDON

I was invited to join the London Orthopaedic clinic as the first female Foot and Ankle Surgeon in the Harley Street area. In addition to the conditions that I treat in my NHS practice, I am also developing a specialist interest in hypermobility and the Performing Arts. The significant benefit of Private Practice as a Consultant, is having more time to spend with patients and be to understand how their condition or injury impacts on their life. Being able to develop a bespoke lifestyle service, which not only helps patients heal and recover, but also considers their work / life balance, is hugely rewarding. It also gives me an opportunity to meet people from different backgrounds and cultures, which in itself is very satisfying.

CONSULTANT ORTHOPAEDIC FOOT AND ANKLE SURGEON HAIRMYRES HOSPITAL, NHS LANARKSHIRE

FOOT AND ANKLE SERVICE

I established an integrated multidisciplinary Foot and Ankle Service for NHS Lanarkshire.

- Supervising the vetting of all Foot and Ankle referrals for NHS Lanarkshire
- Development of Musculoskeletal pathway for Foot and Ankle
- Development of patient information leaflets and post-operative protocols
- Establishing agreed outcomes of assessment for conservative and surgical treatment of foot and ankle pathology
- Training and education of medical, nursing and allied health professionals with regards to foot and ankle pathology
- Established Virtual and Specialist Multidisciplinary Foot and Ankle Clinics
- Development of Nurse Led Foot and Ankle Clinic
- Management of Diabetic and Rheumatoid Foot and Ankle patients

I employ the most up-to-date techniques in Foot and Ankle Surgery, including: Minimally Invasive Surgical techniques, foot and ankle arthroscopy and soft tissue techniques, total ankle replacement and deformity correction (excluding Ilizarov / TSF). I take referrals from all three Lanarkshire hospitals for complex foot and ankle trauma.

MANAGEMENT

LEAD CLINICIAN ORTHOPAEDICS - HAIRMYRES HOSPITAL

2012 - 2014

This position enabled the development of the Orthopaedic and Trauma Service at Hairmyres Hospital and NHS Lanarkshire. My first year focused on developing the Trauma service, which involved rota changes, establishment of a daily Trauma Meeting and development of an escalation policy for when demand outstrips capacity. Monthly Orthopaedic Departmental Meetings were established, involving all representatives from all aspects of the outpatient and inpatient service, including medical, nursing, allied health professionals and the business manager for Orthopaedics, Orthopaedic Departmental Co-Coordinator and Head of the secretarial staff. This group addressed all aspects of the patient journey from point of referral to discharge. It encompassed outpatient clinics, pre-assessment, day surgery, inpatient wards and theatres. As Lead Clinician for Orthopaedics I represented the department on the following committees:

Theatre Operational Group	Surgical Clinical Risk Group
Referral and E-Vetting	MSK Pathways

The NHS Lanarkshire Orthopaedic reconfiguration group, was established following the Healthcare Inspection Scotland Report, which acknowledged concerns over the quality of care of Orthopaedic Services at Hairmyres Hospital, I was involved analyzing the rotas for the junior and middle grades, to attempt to provide appropriate overnight cover. I was the representative for NHS Lanarkshire for the MSK Orthopaedic Quality Drive and ACCESS programme, for the Scottish Government.

BOFAS – SURGICAL PODIATRY SUB-COMMITTEE

2014 - 2015

Member of the BOFAS sub-committee, which is working with NES (National Education Scotland) to develop course, examination and appraisal standards equivalent to the FRCS Tr & Orth, to ensure that any course that is developed for the training of Podiatrists Practising Surgical Podiatry, meet equivalence to the that of Orthopaedic Foot and Ankle Surgeons, who practice forefoot surgery.

CLINICAL EXPERIENCE

OBSERVATIONAL FELLOWSHIP

Dr Mark S Myerson

05/2011

Institute of Foot and Ankle Reconstruction, Mercy Medical Centre
Baltimore, MD, US

SPECIALIST FOOT AND ANKLE TRAINING

As a Consultant I trained with Mr David Redfern (Brighton) and Dr Joel Venoir (Sussex and France) in Minimally Invasive Surgical techniques. I have also trained extensively in Total Ankle Replacement. I have developed my surgical skills in arthroscopy and soft tissue reconstruction of the foot and ankle.

Elective Foot and Ankle Experience

Minimally Invasive and Open Surgical Correction of	Management of Ankle Arthritis	Ankle arthroscopy and Sports Injury
Hallux Valgus	Mid-foot Osteotomy and Fusion	Total Ankle Replacement
Hallux Rigidus	Hind-foot Fusion	Ligament Reconstruction
Lesser Toe Deformity Correction	Diabetic Correction including Charcot Deformity Correction	Ankle Fusion
		Tendon Debridement and Repair
		Management of Non-Union
		Tendon Transfer

Trauma Foot and Ankle Experience *Conservative and Surgical Management*

Common and Complex Foot and Ankle Trauma	Sports Injury
Ankle Fractures	Pilon Fractures
Metatarsal and Phalangeal Fractures	Lateral Ligament Complex Injuries
Talar and Navicular Fractures	Calcaneal Fractures
	Acute Achilles Tendon Ruptures
	Midfoot Fracture Dislocations
	Lisfranc injuries

GENERAL ORTHOPAEDIC AND TRAUMA TRAINING

Specialist courses in Foot and Ankle Surgery. 6 years General Orthopaedic and Trauma Surgical Training, has provided exposure to all aspects of the specialty. I participated in over 1800 surgical procedures attained competency in the following General Orthopaedic Surgical procedures:

Elective Orthopaedics Trauma

Hip Arthroplasty	Knee Arthroplasty	Hip Fracture	Long Bone Fractures – upper and lower limb
Diagnostic and Therapeutic Arthroscopy (Hip, Knee, Shoulder)	Spine	Shoulder, Elbow, Wrist and Hand Trauma	Soft tissue injuries
Elbow	Hand	Including tendon, nerve and vascular injuries	Paediatric trauma
Paediatrics		<i>Exposure to:</i>	
		Complex intra-articular trauma	Spinal Injuries

RESEARCH

Current

Biomechanical Analysis of Pressure Transmitted in Weight-bearing Casts During Immediate Six Week Rehabilitation Period, Post Open Reduction and Internal Fixation of Weber B Ankle Fractures

Miss RJ Miller, Mr R Rooney – Hairmyres Hospital

Mr CS Kumar – Glasgow Royal Infirmary

Department of Biomechanics, Strathclyde University

A number of patients require admission to the rehabilitation ward, as they are unable to non-weight-bear following ORIF of ankle fracture. Pain inhibition prevents patients fully weight-bearing until the fracture is healed. Patients should be instructed to weight-bear immediately post operatively.

To confirm this we are undertaking a pilot study utilizing a pressure transducer to establish the amount of pressure taken by the injured limb at weekly intervals for the six-week period.

Completed

INTERCALATED BSc MEDICAL SCIENCES 2(i) HONOURS

The Correlation Between Abnormal Psychopathology and Biochemical Markers Following Orthopaedic Trauma

Professor D A A Alexander, Department of Mental Health, University of Aberdeen.

1998

Professor J D Hutchison, Department of Orthopaedics, University of Aberdeen.

Case-controlled pilot study to determine an association between biochemical markers and the physical and psychological aspects of trauma. The fundamental markers of the inflammatory response, (IL-6, IL-6r and CRP), were compared with symptoms of PTSD.

This pilot study showed positive correlation between some of the symptoms of PTSD, particularly intrusive phenomena and the acute phase inflammatory markers. This work has been published and subsequently formed the basis of a subsequent larger study.

OTHER

Intra and Extrasosseous Blood Supply to the Navicular

2010

Mr CS Kumar

Department of Orthopaedics, Glasgow Royal Infirmary

Dr Q Fogg

Department of Anatomy, University of Glasgow

There is little in the literature with regards to the blood supply to the navicular. We are undertaking an anatomical study to determine the blood supply to the navicular, which may explain the clinical observation that the lateral aspect is more commonly affected by avascular necrosis or osteochondritis.

Evaluation of a Diagnostic Questionnaire for Carpal Tunnel Syndrome

2004

Mr T E J Hems

Department of Orthopaedic Surgery, Victoria Infirmary, Glasgow.

Computer Assisted Learning for Plastic Surgery

2003

A J Durrani, Miss M P Davies, Mr J D Holmes.

Department of Plastic Surgery, Aberdeen Royal Infirmary.

Mr N M Hamilton, CAL Unit, University of Aberdeen.

AUDIT
Current

Inbone II Total Ankle Replacement for End-Stage Total Ankle Arthritis

Short term follow-up of 20 Inbone II total ankle replacements performed in NHS Lanarkshire by a single surgeon.

The use of the Internal Brace System for Lateral Ankle Ligament Reconstruction

Short term follow-up of 16 arthroscopic lateral ligament stabilizations using Arthrex Internal Brace System, performed in NHS Lanarkshire by a single surgeon.

Minimally Invasive Surgery in Forefoot Conditions

Medium term follow-up of 100 minimally invasive forefoot procedures (40 hallux valgus and 60 hallux rigidus procedures), performed in NHS Lanarkshire by a single surgeon, compared with open procedures performed by the same surgeon.

Minimally Invasive Surgery for Significant Deformity Correction Secondary to Diabetic Charcot Arthropathy

Short term follow-up of 6 minimally invasive midfoot Charcot corrections performed in NHS Lanarkshire by a single surgeon.

Minimally Invasive Joint Preparation and Percutaneous Intra-Medullary Nailing for Hind-foot Arthritis

Short term follow-up of 6 minimally invasive hind-foot fusions performed in NHS Lanarkshire by a single surgeon.

Effectiveness of Conservative Treatment with Biomechanical Podiatry for Forefoot Pathology

Follow-up of 450 patients treated conservatively with Biomechanical Podiatry for Forefoot pathology at two years.

Effectiveness of Conservative Treatment with Biomechanical Orthotics for Treating Hind-Foot and Ankle Arthritis

Follow-up of 25 patients treated conservatively with Ankle-Foot-Orthoses at three years

Effectiveness of an Integrated Multidisciplinary Foot and Ankle Pathway at Streamlining the Pathway Management for Foot and Ankle Patient in NHS Lanarkshire

Health economics analysis of the benefits of streamlining the pathways from referral through conservative treatment to surgical management and post-operative management, by development of Virtual and Butterfly Multidisciplinary clinics.

The Deltoid Ligament and Bimalleolar Ankle Fractures	Glasgow Royal Infirmary	2006

MEDICAL EDUCATION

I inspire and motivate both Junior Doctors and Allied Health Professionals. I take an interactive approach to teaching and training, enabling others to develop their own knowledge and clinical skills. I stimulate Students, Doctors and Allied Medical Professionals to develop an enquiring mind, encouraging Best Medical Practice, Research and Audit, and Service Delivery.

SCHOLARSHIPS

McCunn Scholarship	£500	1999
Roland Sutton Scholarship	£500	
Vanderville Scholarship	£500	
Medical School Elective		

Department of Mental Health, Yale University, USA.
Supervisor: Professor C A Morgan III.

Summer Research Project		

Department of Public Health, University of Aberdeen.
Supervisor: Dr B Wilson.

Utilised a structured interview technique to investigate the effect of genetic counselling and dietary advice on people at risk of developing colorectal cancer.
Obtained in open competition.

CAREER AIMS

Having effectively established an integrated multidisciplinary Foot and Ankle Service in NHS Lanarkshire my focus is now on establishing a Private Practice based in London at the London Orthopaedic Clinic and Princes Grace Hospital.
My main interests within Foot and Ankle Surgery are the continued development of Minimally Invasive Foot and Ankle procedures, which includes diabetic foot pathology and complex deformity correction. I also intend to further develop my foot and ankle Sports pathology, including arthroscopic procedures. I continue to develop my total ankle arthroplasty practice, including outcomes associated with the procedure.
I am very interested in teaching and training, including GP's, Physicians and other Orthopaedic Surgeons. I also enjoy working closely with allied health professionals and will continue to develop these links and close working practices.
